

Ezequiel Padilla Machado *Full-Stack Ruby on Rails Developer*

ezequiel.padilla.m@gmail.com • +598 94 055 555 • Montevideo, Uruguay • [linkedin.com/in/ezequiel-padilla](https://www.linkedin.com/in/ezequiel-padilla)

Software Developer with 6+ years of experience specializing in Ruby on Rails and full-stack development. Proven ability to lead projects end-to-end, make independent architectural decisions, and mentor junior developers. Developed solutions as sole developer and within collaborative teams across 2 technology stacks (Ruby on Rails and NestJS/AngularJS). Passionate about writing clean, maintainable code and continuously expanding expertise with emerging technologies.

PROFESSIONAL EXPERIENCE

Full-Stack Ruby on Rails Developer, Vairix

07/2025 – 06/2026 | Montevideo, Uruguay

Contributing to client projects as a Full-Stack developer, working primarily with Ruby on Rails and modern web technologies within an agile environment.

- Collaborated within a 5-person cross-functional team to design, develop, and deliver new features aligned with client requirements.
- Delivered 6 complete features with an average development cycle of 1+ month each, from requirements to production.
- Built features spanning backend logic, database modeling, and frontend interfaces.
- Wrote clean, maintainable code following best practices and participated in code reviews.

Tech stack: Ruby on Rails · Hotwire · PostgreSQL · Heroku · Stripe · Auth0

Full-Stack Developer, GlobalUY

08/2023 – 07/2025 | Montevideo, Uruguay

Led development of a comprehensive livestock management platform covering purchase/sale operations, auctions, and entity control across a multi-project environment.

- Designed and built one sub-project from scratch using NestJS and AngularJS, integrating it seamlessly with the broader platform.
- Implemented a CRM module in Ruby on Rails, adapting the architecture to meet specific domain requirements.
- Owned all new features, technical decisions, and maintained a platform spanning 4 interconnected applications over 2 years as the sole developer.
- Managed cloud deployment and infrastructure on AWS, and integrated Google Maps API for location-based features.
- Supported a database of 500+ clients across purchase/sale operations, auctions, and entity control modules.

Tech stack: Ruby on Rails · Hotwire · NestJS · AngularJS · Google Maps API · AWS · PostgreSQL

Internship Lead Technician, GlobalUY

05/2024 – 11/2024 | Montevideo, Uruguay

Led the onboarding and technical mentorship of a high school intern as part of the GlobalUY × ÁNIMA program, designing and delivering a structured 6-month learning path from scratch.

- Designed a custom learning path based on real-world experience, covering JavaScript, Ruby, and Ruby on Rails fundamentals.
- Guided the intern through the full 6-month program; upon completion they successfully joined a Rails development team.
- Applied and strengthened skills in technical communication, teaching methodology, and junior developer support.

Tech stack: Ruby on Rails · JavaScript · Ruby

Full-Stack Ruby on Rails Developer, eagerWorks

06/2022 – 07/2023 | Montevideo, Uruguay

Joined an ongoing project to deliver new features and led a major frontend migration from Vue.js to Hotwire, improving performance and long-term maintainability over a 12-month engagement.

- Led the migration from Vue.js to Hotwire, reducing frontend complexity and achieving ~20% improvement in page load times.
- Collaborated within a 3-person team maintaining direct communication with the client across the full project lifecycle.
- Configured and managed AWS infrastructure (EC2, S3) for project hosting and deployment.

Tech stack: Ruby on Rails · Hotwire · Vue.js · Bootstrap · SCSS · AWS

Full-Stack Ruby on Rails Developer, eagerWorks

12/2021 – 06/2022 | Montevideo, Uruguay

Led end-to-end development of PlanIt, a greenfield project over 6 months, taking on both technical and team coordination responsibilities within a lightweight Scrum process.

- Managed a team of 3 developers, driving key technical decisions and distributing tasks effectively.
- Integrated MercadoPago as the payment solution, coordinating the implementation with an external company to ensure smooth cross-team collaboration.
- Applied a pragmatic Scrum methodology, focusing on the most impactful ceremonies to keep the team aligned and delivery on track.

Tech stack: Ruby on Rails · Bootstrap · SCSS · Heroku · MercadoPago

Full-Stack Developer (High School Internship), eagerWorks

07/2020 – 12/2021 | Montevideo, Uruguay

Joined eagerWorks through a high school internship program, completing a 6-month structured onboarding focused on Ruby on Rails and JavaScript fundamentals before contributing to production projects.

- Built core JavaScript and Ruby skills through an intensive 6-month onboarding program covering Sinatra and Ruby on Rails.
- Contributed to PlanIt's internal prototype from scratch, later taking ownership as team lead of a 3-person team — the same project that evolved into the production version described above.

Tech stack: JavaScript · Ruby · Sinatra · Ruby on Rails
